High Power Rifle Match Weapon Requirements Match Rules and Match Stages

All rifles used for the match must meet the minimum requirements for use at the Weber County Sport Shooting Complex. Minimum requirements are centerfire rifle 16" minimum barrel length, caliber with a minimum muzzle velocity of 2,400 fps, have a minimum four power optic no aim point e-otech or other red dot type scopes. Rifle and scope must have been zeroed on paper before being used on the 300 yard range. (Rifles that have only been bore sighted are not allowed). All range safety rules will be strictly enforced during the match and eye and ear protection are mandatory.

Although a minimum four power scope is required for use of the range, it is highly recommended that match shooters have a 16 power or greater scope.

In some stages you will fire up to 10 rounds under time constraints, a rifle with a removable magazine is preferred but not required.

Match rules will be explained at each event and may change based on the match being held.

Each match consists of five stages and all shooting is done from a bench rest position using a front bi-pod or sand bag and a rear bag. Slings are allowed (no sleds or full rifle support bags allowed). If all possible shots are taken during the match, 33 shots will be fired.

**Cost of the Match will be \$20.00 which will cover the range fee and all targets.**

**Stage One-** Know Your Limits: This stage is fired at 100 yards. There are five diamond bullseyes and one sighter box on each target. Six shots can be fired in this stage, points increase as the diamond size decreases. Points are earned with each scorable shot within the diamond. Diamonds must be shot in order from large to small and shooters may stop in this stage at any time and collect points earned. If a diamond is missed, the shooter loses all points for that stage. Time for this stage is 60 seconds.

**Stage Two-** Same as stage one, shot at 200 yards. (Six shots possible during this stage) Time for this stage is 60 seconds.

**Stage Three-** Best five shot group with sighter square and small diamond bonus points (ten shots possible) If bonus point shots are taken and missed all points for this stage are lost. Time for this stage 100 seconds

**Stage Four-** Same as stage three fired at 100 yards (ten shots possible) If bonus point shots are taken and missed all points for this stage are lost. Time for this stage 100 seconds

**Stage Five-** Balloon shoot at 300 yards. There will be three balloons stapled to the target, a shooter gains 150 points for each balloon hit. However the first miss will deduct 25 points, the second miss will deduct 50 points, and a third miss will deduct 75 point from your overall match score. Limit three shots for this stage. The time for this stage is 90 seconds.
