Hi Quinn,

It splits the project into milestones. Cost is the same but it would require sign off for data collection, build, UAT, and then the completion of all go lives. It just changing the milestone structure to align with the way we are doing this project with the team. All in all it is same cost.

[EXTERNAL]

Hi Andrew,

What all does this affect? Any cost changes? I need to decide if this has to go through our contracts workflow for Commission signature or not.

Thanks, Quinn
