**SCHINDLER ELEVATOR CORPORATION** ("Schindler", "we", "us") and **WEBER COUNTY GOVERNMENT CENTER** ("you") agree as follows:

**PREVENTIVE MAINTENANCE PROGRAM**

Schindler shall furnish Preventative Maintenance at a frequency either determined by the applicable Authority Having Jurisdiction (AHJ) for this location at the time of original commencement, or if no such local requirements exist, in accordance with ASME A17.1. Schindler has developed Maintenance Control Programs (MCPs) for each relevant Equipment type, which meet and exceed ASME code requirements. Our MCPs incorporate tasks, task description, relevant ASME A17.1 code references, and planned performance intervals. These tasks will be completed by a trained Schindler technician. All completed tasks are recorded digitally and are accessible to you, for reference purposes, on our Schindler ActionBoard (web portal).

We will examine, lubricate, and adjust, the Covered Components listed below:

**HYDRAULIC ELEVATORS**

**Basic components:**

- **Controller Equipment**
  - Resistors, timers, fuses, overload switches, minor contacts, wiring, and coils
- **Car Equipment**
  - Guide shoe inserts or roller assemblies, loadweighing devices, and car safety devices
- **Door Equipment**
  - Door operating devices, door protection devices, hangers, closers, interlocks, contacts, and gibs
- **Hoistway and Pit Equipment**
  - Limit switches and buffer(s)
- **Signals and Accessories**
  - Car operating panels, hall stations, in-car and hall lanterns, and their applicable buttons, keyswitches, and bells; signal lamps shall be replaced during regular visits only unless a service request is initiated, in which case that request shall be billable at our standard billing rates

**Major components:**

- **Controller Equipment**
  - Solid state devices, contactors, and PC boards
- **Hydraulic System Equipment**
  - Exposed piping and connections, pumps, motors, and valves
- **Hoistway and Pit Equipment**
  - Exposed piping and connections, above ground hydraulic cylinders, and packings

**CLEANING**

As conditions or ASME code dictate, Schindler shall clean the machine room, car top, and pit of debris related to our work in these areas.

**CALLBACK COVERAGE**

Service dispatching will take place through our Schindler Customer Service Network (SCSN), which is staffed by qualified Schindler personnel, 24/7. You will be provided with a customer identification number, which must be referenced when a call is placed for your facility. Our dispatchers will have access to your building’s service call records, and will promptly relay the details of your call to the assigned technician. Your cab telephone will be directly programmed to dial SCSN.

Schindler shall provide emergency minor adjustment callbacks during regular working hours, including all calls received prior to 3:30 p.m. local time. If you authorize callbacks outside regular working hours, you will pay us at our standard billing rates, plus materials not covered by contract, expenses and travel. All other work outside the services will be billed at our standard billing rates. A request for service will be considered an “emergency minor adjustment callback” if it is to correct a malfunction or adjust the equipment and requires immediate attention and is not caused by misuse, abuse or other factors beyond our control. The term does not include any correction or adjustment that requires more than one technician or more than two hours to complete.

**REPAIRS**

As conditions, usage, or as ASME code dictate, Schindler shall repair or replace the Covered Components. Replacements for the Covered Components are available either at a local Schindler location, at our national Service Distribution Center, or within our network of Schindler approved, third-party suppliers.

**TESTING OF SAFETY DEVICES**

<u>Equipment</u>	<u>Test</u>	<u>Frequency</u>
Hydraulic	Pressure/Relief Valve	Annually

Our testing responsibilities do not include fees or changes imposed by local authorities in conjunction with witnessing, witnessing costs, inspecting, assisting inspection authorities, licensing or testing the Equipment including observation of testing by 3rd parties; changes in the testing requirements after the initial start date of this Agreement, or any other testing obligations other than as specifically set forth above, including, but not limited to seismic tests. Since these tests may expose the equipment to strains well in excess of those experienced during normal operation, Schindler will not be responsible for any damage to the equipment or property, or injury to or death of any persons, resulting from or arising out of the performance of these tests. Further, our testing responsibilities do not include performance, or the keeping of records related to, monthly firefighters service.

## HOURS OF SERVICE

Unless otherwise noted above, all work shall be completed during our regular working hours of regular working days, excluding elevator trade holidays.

## SCHINDLER AHEAD

Additionally, Enhanced customers receive access to Schindler's Elevated Support Professional (ESP) Team. This team analyzes information gathered by Schindler Ahead, which can help reduce equipment downtime in a shutdown situation by performing advanced troubleshooting and can help improve equipment reliability in non-shutdown situations, by scheduling future maintenance on components necessitating it. When appropriate, the ESP Team will communicate with you to schedule service calls. With these enhanced diagnostics, we can guarantee that you will not be charged for Running on Arrival (ROA) calls. Schindler will fully cover the cost of any callback during regular hours related to the following situations: Elevator or Escalator Running in normal operation or running under any of the following special services modes: Independent service, Fireman's service (Phase I or Phase II), or Inspection operation.
