

ADDITION TO WEBER COUNTY CAPITAL IMPROVEMENTS FOR 2026 THRU 2030

Additions to Weber County section of capital improvements for 2026:

In addition to Weber County's more extensive capital improvements list, the following are projects that may seek Community Development Block Grant Funds for 2026.

There is one agency that has requested Weber County sponsor them for 2026 projects. Following is the agency and a brief description of their projects:

1. Weber County Housing Authority – The Weber Housing Authority is interested in applying for CDBG funding for emergency rental and deposit assistance for low-income households in Weber County. This program will be used as prevention dollars to assist households remain stably housed rather than entering the homeless system. The funding would allow a one-time rental payment after the household has exhausted all other resources. The household will be expected to participate in a budgeting class and must have the ability to pay the entire rent amount moving forward.

The following Weber County Project is proposed for 2026 THRU 2030:

Install ADA compliant sidewalk curb ramps at intersections in the Wheat Ridge Subdivision in Weber County.

Additional Needs

1. As stated in Weber County's original consolidated Plan / Capital Improvements Plan, Weber County continues to support non-profit organizations.
2. ADA Standards are always evolving and continual rehabilitation of facilities may be necessary to keep facilities compliant with new standards. Weber County will strive to stay ADA compliant with ADA upgrade projects as may be required.
3. Infrastructure upgrades, pedestrian facilities near and around schools for pedestrian safety and for non-motorized transportation needs, upgrades to water systems within county parks to ensure safe drinking water, and possible sewer projects.
4. Storm Water Flood Control is always a critical need. Because of the nature of floods, the location of flooding is not always predictable and a specific project solution is not known.
5. Implement a program to assist low income families or families at risk.

Re: Commission agenda item for January 6th, 2026

Approval to Add Possible Community Block Grant Project to Weber County's Capital Improvements for 2026 thru 2030

As part of the CDBG process, non-profit agencies that may request sponsorship through the county for CDBG funds need to be added to our capital needs for 2026 thru 2030. The adoption of the capital improvement plan must take place after the public hearing.

The Weber Housing Authority has asked for the County's sponsorship for a CDBG Project in 2018. They did have someone at the How To Apply Meeting and are eligible to make application should the County sponsor them.

We have also been asked to rank our projects in order of priority. I have placed each of them in an order of importance. If you feel one project is more desirable than the other, then we can change them to reflect such. This can be discussed if necessary.

See Attached Document to be approved for Additional Improvements

Please let me know if you have any additional questions.
